TASTING NOTES:

Bursting vine tomato, lemon and cardamom spice with a hint of sweet buttery body.

Kaganda Coffee Factory is located in Central Province, Muranga County in Murarandia location of Kiharu Division near Muranga town. It was established in 1970 and rests on a 5 acre piece of land serving Gathiru, Gathaiti, Gathambara, Gatuongo and Kagaa villages. Currently it is affiliated to Kaganda Farmers Co-operative Society. Its membership currently stands at 1050. The most unique aspect of this factory is that it's situated in a valley within Tea growing area.

After harvesting all the coffee is delivered to the factory and undergoes the wet processing method. Water is pumped using a Diesel engine from Dam reservoir to the reservoir tanks for pulping and recycling

After pulping the coffee is stored overnight, washed, soaked and spread on the drying tables. The parchment is then frequently turned on the drying tables, sorted and stored awaiting delivery to the dry mill.
